

FUEL CELL – GDL RECOMMENDATIONS

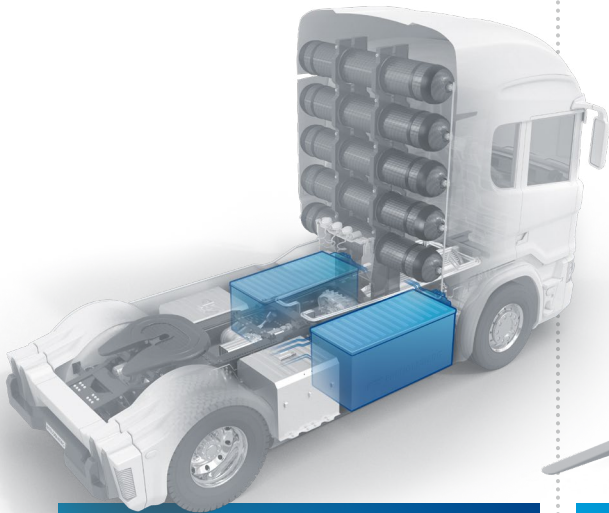

OUR BESTSELLERS

Freudenberg produces a comprehensive range of Gas Diffusion Layers (GDL) designed to meet all operative conditions and requirements in Hydrogen.

The Gas Diffusion Layers are manufactured using Freudenberg's proprietary nonwoven technology. This enables a high degree of design flexibility to meet the specific needs of the market.

H15C15

for longest lifetime

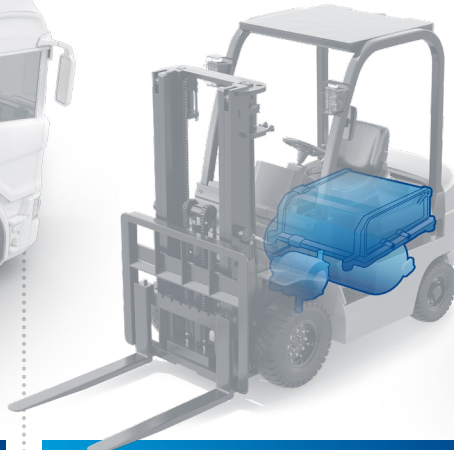

HEAVY DUTY

- Heavy duty / medium duty trucks
- Busses
- Trains and ships
- Airplanes

H23C8

smoothest MPL for excellent electrode coating

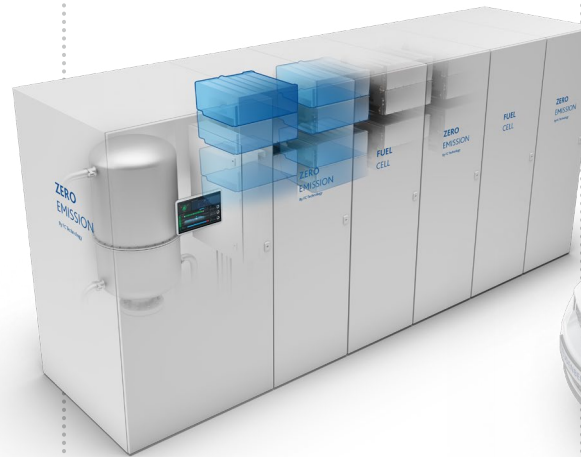

MATERIAL HANDLING

- Forklift trucks
- Dump trucks

H15C13

for highest efficiencies

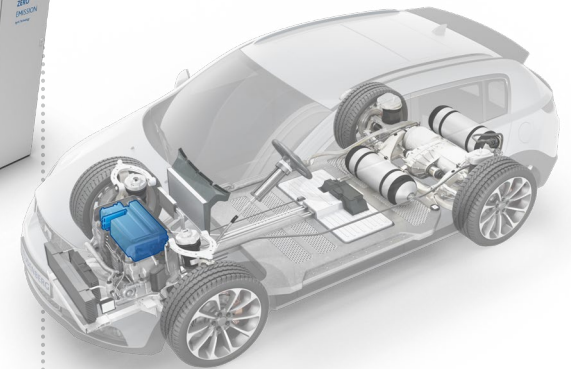

STATIONARY APPLICATION

- Local power generation
- Combined heat and power systems

H15C14

for highest dynamic range

AUTOMOTIVE

- Materials offering high performance
- Passenger cars and light vehicles
