

PERFLUOROSULFONIC ACID (PFSA) RESIN POWDER PFSA-PW-1890 LOW EW GRADE

Perfluorosulfonic acid resin powder is the functionalized material with cation exchange property, has excellent stability and chemical resistance, widely used for solid acid catalysis and other relevant applications.

Specification	PFSA-PW-1890
PFSA Content (Long side chain), wt%	≥90
Cationic form	H+
Molecular Weight	300K~500K
End Group Fluorinated	Yes
VOC Content, %	None
Equivalent Weight (EW), g/mol	800-900
Other Content, %	Water≤10%
Melt Flow Index (MFI)	Not determined
Appearance	White Powder
