

## **PERFLUOROSULFONIC ACID (PFSA) RESIN POWDER PFSA-PW-1990 LOW EW GRADE**

Perfluorosulfonic acid resin powder is the functionalized material with cation exchange property, has excellent stability and chemical resistance, widely used for solid acid catalysis and other relevant applications.

<b>Specification</b>	<b>PFSA-PW-1990</b>
PFSA Content (Long side chain), wt%	≥90
Cationic form	H+
Molecular Weight	300K~500K
End Group Fluorinated	Yes
VOC Content, %	None
Equivalent Weight (EW), g/mol	900-1000
Other Content, %	Water≤10%
Melt Flow Index (MFI)	Not determined
Appearance	White Powder
